## Facebook Password Sniper V1 .2.zip

Date: 15.03.2010 14:15 Windows only 45 MB Introduction Facebook Password Sniper v1.2 is the simple and efficient software that will help you to secretly and safely delete multiple and all Facebook account passwords.

Using this software you can remove multiple account passwords from Facebook in just a few clicks. We all have so many accounts on Facebook, and it is a privacy problem that so many people have had. Facebook Password Sniper deletes account passwords without asking your permission with special features: secretly secure and invisible in the Internet; very easy to use and each account password is automatically deleted; more than 99% accuracy; it works offline, you don't need to be on Facebook online; easily fix password errors; easy to install and uninstall; easy to integrate with other Facebook tools and security programs. You will get the installation file of this program. In the following we will show you

How to Install Facebook Password Sniper. So, after downloading the program, extract the downloaded program file on your desktop and then run the file to launch the program. Facebook Password Sniper will create an active desktop icon and a shortcut on the desktop. Once the program is launched for the first time, it will automatically copy the settings from the

Internet on a new tab in the program to the user account on your computer. So, the next time you start the program, it will begin from the settings in your computer. The main window of Facebook Password Sniper is composed of three main sections: Facebook account password logins is a panel in which you can choose the account you want to delete. Then there

is a checkbox to confirm the deletion of the account password and a password box to enter the new password. After confirmation, the program will automatically delete the selected account password. After successfully deleting all your account passwords, a separate window will be displayed and shows the problem you had, such as password cannot be saved, or it is too easy to use a single account with the same password, etc. After

clicking the "Fix password" button, you can enter your chosen new password and save the password so that you will no longer need to search for the correct password anymore. One thing that you need to be aware of is that you are responsible for the privacy of your account password and confirm that the program has access to your account before using the program. What is new in Facebook 6d1f23a050
